## Inspiring Our Customers

At Staco, we believe energy management and sustaining resources for environmental improvement are part of our corporate responsibility. We fully support the U.S. Green Building Council, LEED (Leadership in Energy and Environmental Design) and ENERGY STAR programs. Further, virtually all of our product technologies are designed to promote energy efficiencies and comply with applicable RoHS directives (hazardous substances). Plus, many of our products can help reduce CO<sup>2</sup> pollution derived from electric power generation. With the power of human energy, Staco will continue to enhance and preserve our natural assets.

## About Staco Energy Products Company

*Since 1937, customers worldwide have been relying on Staco Energy Products Company to deliver voltage control and power quality solutions tailored to their needs.*

*As a leading power quality resource, we offer our customers world-class support; from our thorough applications assessment, to our ability to design and deliver a solution that is tailored to the specific needs of our customers; through delivery and commissioning.*

*Our professional, factory trained service team is in place to ensure that our customers' revenues are protected, and their investment provides them with many years of trouble free operation.*

*Staco develops total power solutions for OEM and end user applications.*

**We offer a wide array of power quality products, including:**

- **Uninterruptible Power Supplies**
- **Power Conditioners**
- **Voltage Regulators**
- **Power Factor Correction and Harmonic Mitigation**
- **Active Harmonic Filters**
- **Variable Transformers**
- **Custom Engineered Test Sets**
